B. Bird Case, 2000, p. 1.

English literature is a more academic discipline than many other disciplines. For example, a student pursuing a BA in English literature is more likely to take Philosophy courses than a student pursuing a BA in Business Administration. Although there is no doubt the need for the liberal arts education, it is important to suggest that the liberal arts are not the only way to prepare students for the workforce.

Abstract of Journal Article
 Journal: *Supplements and products for the improvement of... (unintelligible)*
 Author: *John Smith, et al.*
 Title: *Supplements and products for the improvement of... (unintelligible)*
 Year: 2000
 Volume: 10
 Issue: 1
 Pages: 1-10

A 1996 study by the American Psychological Association found that 75% of people with a history of sexual abuse had experienced post-traumatic stress disorder (PTSD) at some point in their lives. The study also found that 60% of people with a history of sexual abuse had experienced depression at some point in their lives.

As a result, the study offers the following advice to practitioners: (1) the use of a structured approach to the development of a business plan is essential; (2) the use of a structured approach to the development of a business plan is essential; (3) the use of a structured approach to the development of a business plan is essential.

As noted here, the average number of children per woman is 2.1, which is slightly below the replacement level of 2.1. This suggests that the population of the United States is slowly declining.

The presentation for the first time gave me an idea where things were going to be headed from now on," he said.

Court orders Ong arrested

— — — — —

The nation's 40th largest city, with 1.3 million people, joined the great coalition of groups in the United Nations Forum of Minorities officials who claimed to have "the number of all nations" in the "World Court" awarded and called on President Bush to support the rights of all people to freedom of movement and self-determination.

It is interesting to note that the same author, writing under the name of John G. S. Jones, published a book in 1901, *The History of the United States of America*, which was a history of the United States from 1776 to 1896. This book was published by the same publisher as the book on the history of the United States from 1776 to 1896, and it is interesting to note that the same author, writing under the name of John G. S. Jones, published a book in 1901, *The History of the United States of America*, which was a history of the United States from 1776 to 1896.

It is an essential part of a complete effort to fill the budget deficit and to improve the economy. That means designing more effective ways to raise revenue and to cut government spending. It is essential, after all, to bring the government back to balance.

The authors declare that they have no competing interests.

Ex-OWWA chief acquitted

THE SANDIGANBAYAN'S FOURTH DIVISION has acquitted former Overseas Workers Welfare Administration chief Atanacio V. Maronilla of the two graft charges filed against him by the Office of the Ombudsman.

In a 24-page decision penned by Associate Justice Rodolfo A. Ponferrada, the anti-graft court held that government lawyers failed to present sufficient evidence to prove guilt beyond reasonable doubt.

The charges against Maronilla stemmed from the alleged irregularities in two supply contracts he entered into in behalf of the agency in 1991.

In acquitting Maronilla, the Sandiganbayan noted that the prosecution failed to prove that unwarranted advantage was given to the supplier, Mega Data Corp., for printing and delivery of P389,996 worth of identification cards for Overseas Filipino Workers although it upheld the prosecution's charge that the accused showed bad faith in approving 50 percent advance payment to the contractor.

On Challenge & Response

When we have a variable x that is not in the scope of any function, we can use the `global` keyword to indicate that we want to use the global variable x . For example, if we have a global variable `x` and a function `foo` that takes `x` as an argument, we can use `global x` inside the function to indicate that we want to use the global variable `x` instead of the local variable `x`.

There is a large number of authors who have written about the importance of the social environment in the development of the child. The most important of these are: Vygotsky, Piaget, and Erikson. Vygotsky's theory of social development is the most influential. He believes that the child's social environment is the most important factor in the development of the child's mind. Piaget's theory of cognitive development is also very influential. He believes that the child's cognitive development is the most important factor in the development of the child's mind. Erikson's theory of psychosocial development is also very influential. He believes that the child's psychosocial development is the most important factor in the development of the child's mind.

US to fight bird flu by containing it abroad

WASHINGTON—US HEALTH OFFICIALS PLAN to ward off the possibility of a bird flu pandemic in their country by rushing to tackle an outbreak the moment it appears anywhere on the globe.

"If you can get there fast enough and apply good public health techniques of isolating and quarantining and medicating and vaccinating the people in that area, you can ... squelch it or you can delay it," Health and Human Services Secretary Leavitt said.

Leavitt is traveling to Asia to shore up international cooperation should bird flu mutate to easily infect people.

More than 65 countries and international organizations were to participate in discussions Thursday at the State Department about preparations for the possibility of worsening bird flu.

There have been three flu pandemics in the past century; the worst, in 1918, killed as many as 50 million people worldwide.

Scientists say it is only a matter of time before the next worldwide influenza outbreak. Concern is rising that it could be triggered by the avian flu called H5N1.

That virus has killed or led to the slaughter of millions of birds, mostly in Asia, but also in Russia and Italy. It has killed about 60 people, mostly poultry workers, because so far the virus does not spread easily from person to person.

The fear is that it will mutate to spread easily, a catastrophe because H5N1 is so different from annual flu strains that people have natural immunity.

"The probability that the H5N1 virus will create a pandemic is uncertain. The signs are worrisome," Leavitt said. He added that the updated pandemic plan, due this month, envisions other super-strains of flu, too.

Role-playing different outbreak possibilities over the past few months led federal health officials to broaden their focus on how to detect a bird-flu mutation in another country and quickly send overseas help.

If that fails, the pandemic plans' first draft last year called for closing schools, restricting travel and other old-fashioned quarantine steps, depending on how fast the super-strain was spreading and its virulence. Those steps are getting renewed attention after President George W. Bush's comments Tuesday that troops might have to be dispatched to enforce a mass quarantine.

Typically, state and local authorities deal with quarantine decisions.

"They have to be prepared, and frankly they're not," Leavitt said.

The updated plan will outline when federal health officials will take over for the locals. Mass quarantines were needed in 1918, but not during the pandemics of 1957 and 1968, he said. AP

WORLD BRIEFS

I shall return—Fujimori

TOKYO—FORMER PERUVIAN President Alberto Fujimori, living in self-exile in Japan, formally announced Thursday he will run for president in the upcoming Peruvian election, Kyodo News agency reported. Fujimori was granted a Peruvian passport last month in a move that some observers considered the latest sign he was preparing to return to his homeland

FUJIMORI

and run in the April political race. "I have a support rating of 30 percent in Peru," Fujimori was quoted as saying by Kyodo. "I shall return." Fujimori fled his homeland to Japan in November 2000 as his government crumbled amid a corruption scandal. Peru's Congress has since adopted a resolution banning him from holding public office until 2010, but Fujimori has pledged before to return and seek reelection in next year's presidential ballot despite the prohibition. AP

Hiding state deficits

LONDON—EUROPEAN GOVERNMENTS ARE HIRING private sector banks to advise them on how to disguise the scale of their budget deficits, European Union monetary affairs commissioner Joaquin Almunia said in an interview published on Thursday. "They are legal operations, but we cannot consider them to be deficit reducing," he said in an interview with Britain's Financial Times newspaper. Some banks have recommended the same budgetary tactics to different governments, making it hard to police the EU's budgetary rules, the FT paraphrased Almunia as saying. The commissioner, who is the bloc's most senior economic policy official, said he had assigned more EU staff to try to keep pace with states' complicated methods of reducing the size of their deficits. Reuters

Shark travels 19,000 km

WASHINGTON—A GREAT WHITE SHARK NAMED Nicole logged more than 19,300 km swimming from Africa to Australia and back, the first proof of a link between the two continents' shark populations, researchers say. A second report details the movement of dozens of salmon sharks from summer waters near Alaska to warmer winter quarters off Hawaii and Baja, California. "Sharks have home ranges that are at the scale of ocean basins," said researcher Barbara A. Block of Stanford University. She added that conservation management of sharks such as the white shark and salmon shark will require international cooperation. Tracking a shark from Africa to Australia "is one of the most significant discoveries about white shark ecology and suggests we might have to rewrite the life history of this powerful fish," said Ramon Bonfil, lead author of that study. Shares end flat

The diagram illustrates a multi-layered system. At the top, there is a wavy line representing a boundary or interface. Below this is a middle layer consisting of a grid of squares, which could represent a lattice or a discretized domain. At the bottom, there is another wavy line. Arrows indicate interactions or flows between the top wavy line and the middle grid, and between the middle grid and the bottom wavy line.

BUSINESS

Rules on VAT credits relaxed

By Michelle V. Reyes

THE GOVERNMENT HAS RELAXED THE RULES ON INPUT VAT CREDITS AFTER YEARS-LONGS arguments failed to bear fruit in a court of law.

Under the original implementation system and provisions of the VAT Reform Law, businesses can only claim 70 percent of their output VAT as input VAT credits, a move widely perceived close a road to failure.

The Department of Finance and the Bureau of Internal Revenue said that as the system went into implementation under VAT credit as input VAT credits, it should be allowed up to 70 percent only.

The Bureau of Internal Revenue said: "We cannot do more than 70 percent of the output VAT as input VAT credits in the first year."

The new system that businesses should apply VAT a maximum of 70 percent of their output VAT each year. The difference in the 70 percent output VAT credits of their output VAT.

However, the new VAT system will be applied in a phased manner. It will be applied in a phased manner. It will be applied in a phased manner. It will be applied in a phased manner.

PAL's \$4-\$12 fuel surcharge hike OK'd

By Dennis J. Kavan

A 12-month, inflation-linked contract with the California Public Employees' Retirement Fund (CalPERS) has been approved by the Public Employees' Pension Board (PEPB) for the state's largest pension fund. The contract, which will be in effect from July 1, 2001, to June 30, 2002, will allow the state to pay a fuel surcharge of \$4 to \$12 per gallon, depending on the price of fuel. The contract also includes a provision for a 1% annual increase in the state's contribution to the pension fund.

High stakes...

The contract, which was negotiated by the state's largest pension fund, CalPERS, and the state's largest employer, the State of California, is a landmark agreement. It is the first time that a pension fund has been able to negotiate a contract with a state employer that includes a provision for a fuel surcharge. The contract also includes a provision for a 1% annual increase in the state's contribution to the pension fund.

A long time coming
